First Responder Conferences

RE: Letter of Recommendation

Dear Shawn,

The Arizona Fire Chiefs Association are pleased to partner with 1st Responder Conference, Health and Wellness Training

The fire departments of Arizona are made up of over 9000 firefighters who provide lifesaving resources to their respective communities across the State. We believe the collaboration with 1st Responder Conference is paramount to the mission of each of the departments. For our firefighters to provide the highest level of first response and crisis mitigation, we need our firefighters to be healthy in body, mind, and spirit.

We are fully invested in finding innovative ways to deliver this type of training for our departments to further develop tools and confidence when dealing with the high stress incidents that firefighters are exposed to. Partnering with 1st Responder Conferences provides an excellent way to provide this type of contemporary training which is not only applicable to our members but delivers it in such a way that it gives them the resources to help and support them.

Sincerely,

Tom Shannon, Fire Chief
President Arizona Fire Chiefs Association
