

# WASHINGTON

FRATERNAL ORDER OF POLICE

---

The Washington FOP has fully supported and endorsed 1st Responder Conferences since 2021. We have partnered with and supported seven of their conferences. Many members from various FOP lodges across the state have attended 1st RC conferences and confirmed that the focus and topics offered are completely aligned with the National FOP's priorities regarding first responder wellness. Several of our board members and lodge members are familiar with their personnel, as the founder is a retired Washington State LEO and currently still a member.

1st Responder Conferences consistently seeks out and shares the most current information in the field of health and wellness, delivering speakers and topics that are informative, engaging, and beneficial. Each conference is meticulously planned and executed with the attendees in mind. The primary goal of each conference is to proactively prioritize wellness by providing education, tools, and resources for agencies, first responders, and their families, ultimately enhancing the quality of life for all those who dedicate themselves to serving others.

We highly recommend attending a conference and/or co-hosting or endorsing one if you haven't already. We greatly appreciate 1st Responder Conferences' efforts in supporting our everyday heroes!

Marco Montebianco, President  
Washington State FOP
